COMFORT YOU CAN RELY ON

In Big Ass Fans' two decades of innovation, we've helped thousands of businesses just like yours. Our overhead and directional fans have the power and efficiency to move massive amounts of air with minimal energy use, delivering comfort that transforms how your people work.

But when you choose Big Ass Fans, you're getting more than award-winning products from the undisputed industry leader, you're becoming part of a team with all the tools it takes to win.

THE AUTHORITY ON BIG AIRFLOW

In industrial facilities, tackling hot, cold, humid, or dusty conditions isn't quite as easy as opening a window or adjusting the thermostat. Fortunately, for those who do business in large or unconditioned spaces, Big Ass Fans innovated a cost-effective and energy-efficient comfort solution in the form of high-volume, low-speed (HVLS) fan technology.

HVLS fans work by rotating large airfoils to produce airflow across the space. As the fan's diameter increases, the slower it needs to spin to generate the desired airflow. Thanks to their precise aerodynamic design, Big Ass fans efficiently move massive air volumes and dramatically improve people's comfort, even in harsh environments.

An HVLS fan's breeze across the skin makes people feel up to 10 °F (6 °C) cooler than the ambient temperature and assists the flow of fresh air. In colder months, HVLS fans gently mix heated air that rises to the ceiling back down to occupant level, saving as much as 30% on heating costs.

POWERFOIL X3.0

BUILT FROM THE GROUND UP

In our quest to understand big airflow better than anyone, we invested in a 45,000-square-foot [4,180-square-meter] research lab at our Kentucky headquarters—the world’s first and only facility of its kind specifically designed to test big fans. Whether we’re creating prototypes, measuring air coverage, or building new safety systems, the live tests at this LEED Gold-certified R&D facility give us real data for superior product development.

FINDING COMFORT IN SUPERIOR SAFETY

Big Ass Fans' status as the industry leader was built on an uncompromising commitment to safety. Our expert engineers develop the most innovative and robust fan safety systems on the market, including hub and airfoil retention systems, fire suppression integration, and mounts with no critical welds.

We purpose-build our fans to endure demanding conditions and verify their structural integrity through extensive testing, keeping your people's safety central to every aspect of our products' design and performance.

INDUSTRIAL OVERHEAD FANS

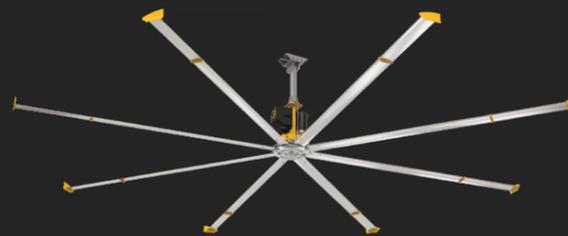

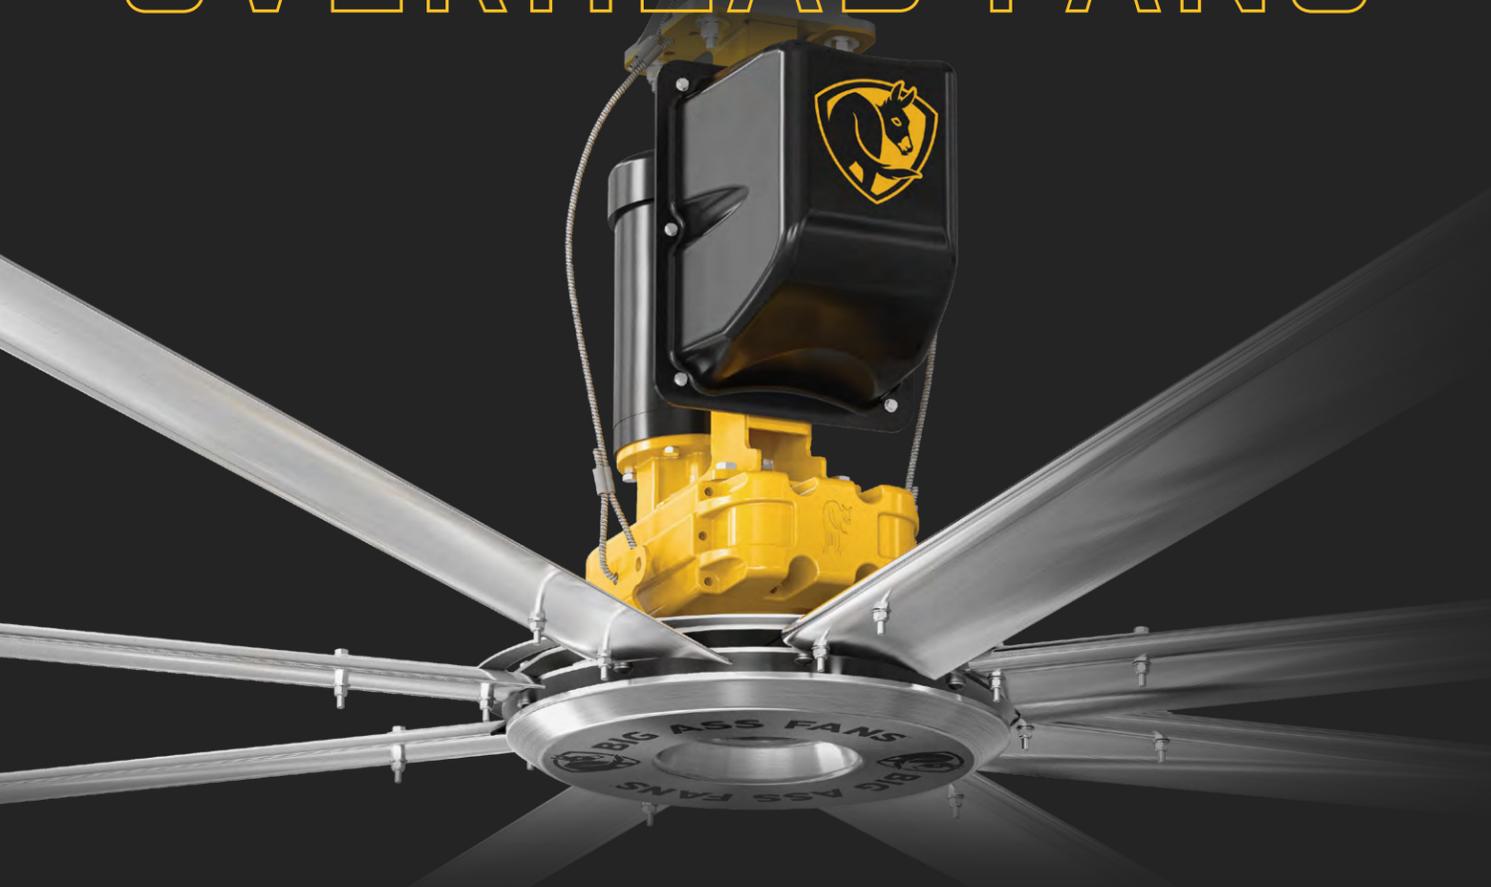

ENGINEERED FOR COMFORT THAT DRIVES PRODUCTIVITY

When conditions in industrial facilities border on the extreme due to oppressive temperatures, surface condensation, or stagnant air, workers need the right solutions to stay safe and productive.

Big Ass industrial overhead fans are designed with the size, power, and efficiency to tackle these challenges head-on. Featuring multi-patented designs and best-in-class safety features, our fans neutralize sweltering heat in summer, equalize facility temperatures in winter, and offer air circulation and energy savings that HVAC and traditional fan manufacturers can only dream of.

KEY FEATURES

- ▶ Superior airflow coverage
- ▶ Energy-efficient motors
- ▶ Extruded aluminum assembly with Grade 8 hardware
- ▶ Digital touchscreen controller or BAFCon upgrade
- ▶ Extensive, industry-leading redundant safety features
- ▶ Patented airfoil systems
- ▶ Reliable ingress protection and heat dissipation
- ▶ Easy integration into building automation systems

TAKE COMFORT IN THE DETAILS

**TOTAL FAN VALUE PROVIDES THE RESEARCH
YOU NEED TO CHOOSE THE PERFECT FAN.**

TOTAL FAN VALUE

**100
POINTS**

Use the final score to
compare models and feel
confident in your selection.

POWERFOIL X3.0

WHAT'S INCLUDED IN THE TOTAL FAN VALUE?

PERFORMANCE

Airflow and efficiency metrics quantify how the fan will impact comfort and energy costs in your space.

- Airflow Performance
- Airflow Coverage Area
- Annual Energy Use
- Controls
- Sound Level

QUALITY

The fan's materials, engineering, and manufacturing process determine its durability and longevity.

- Durability
- Warranty
- Performance Certifications
- Required Maintenance
- Motor and Drive Protection

SAFETY

Strong redundant safety features and verified product testing are essential for secure, consistent operation.

- Static Safety Features
- Dynamic Safety Features
- Safety Certifications
- Facility Integration
- Patented and Proprietary Features

CUSTOMER EXPERIENCE

A company's ability to specify the right products and support its customers makes or breaks the ownership experience.

- Product Specification
- Ease of Installation
- Customer Support
- Customization
- Optional Accessories

POWERFOIL D

We've raised the bar on direct-drive technology with our quietest, most efficient industrial fan ever. The groundbreaking Powerfoil D delivers airflow that radically changes the way people feel and work within your space. Rated IP66 for maximum protection in demanding environments, it takes on hot, gritty conditions with ease and has the specs to excel in any facility where comfort and quiet are valued.

KEY FEATURES

- ▶ **Six anodized airfoils** with winglets and safety restraints
- ▶ **Built-in accelerometer**, safety cables, and Grade 8 hardware
- ▶ **Building automation integration** with 0-10 VDC, Modbus, and BACnet capability
- ▶ **Permanent-magnet motor** and VFD reduce noise, EMI, and energy usage
- ▶ **IP66-rated protection** against dust, water, and vapors for indoor or outdoor use
- ▶ **Best-in-class heat tolerance** with max temperature rating of 131 °F (55 °C)

SEEING IS BELIEVING

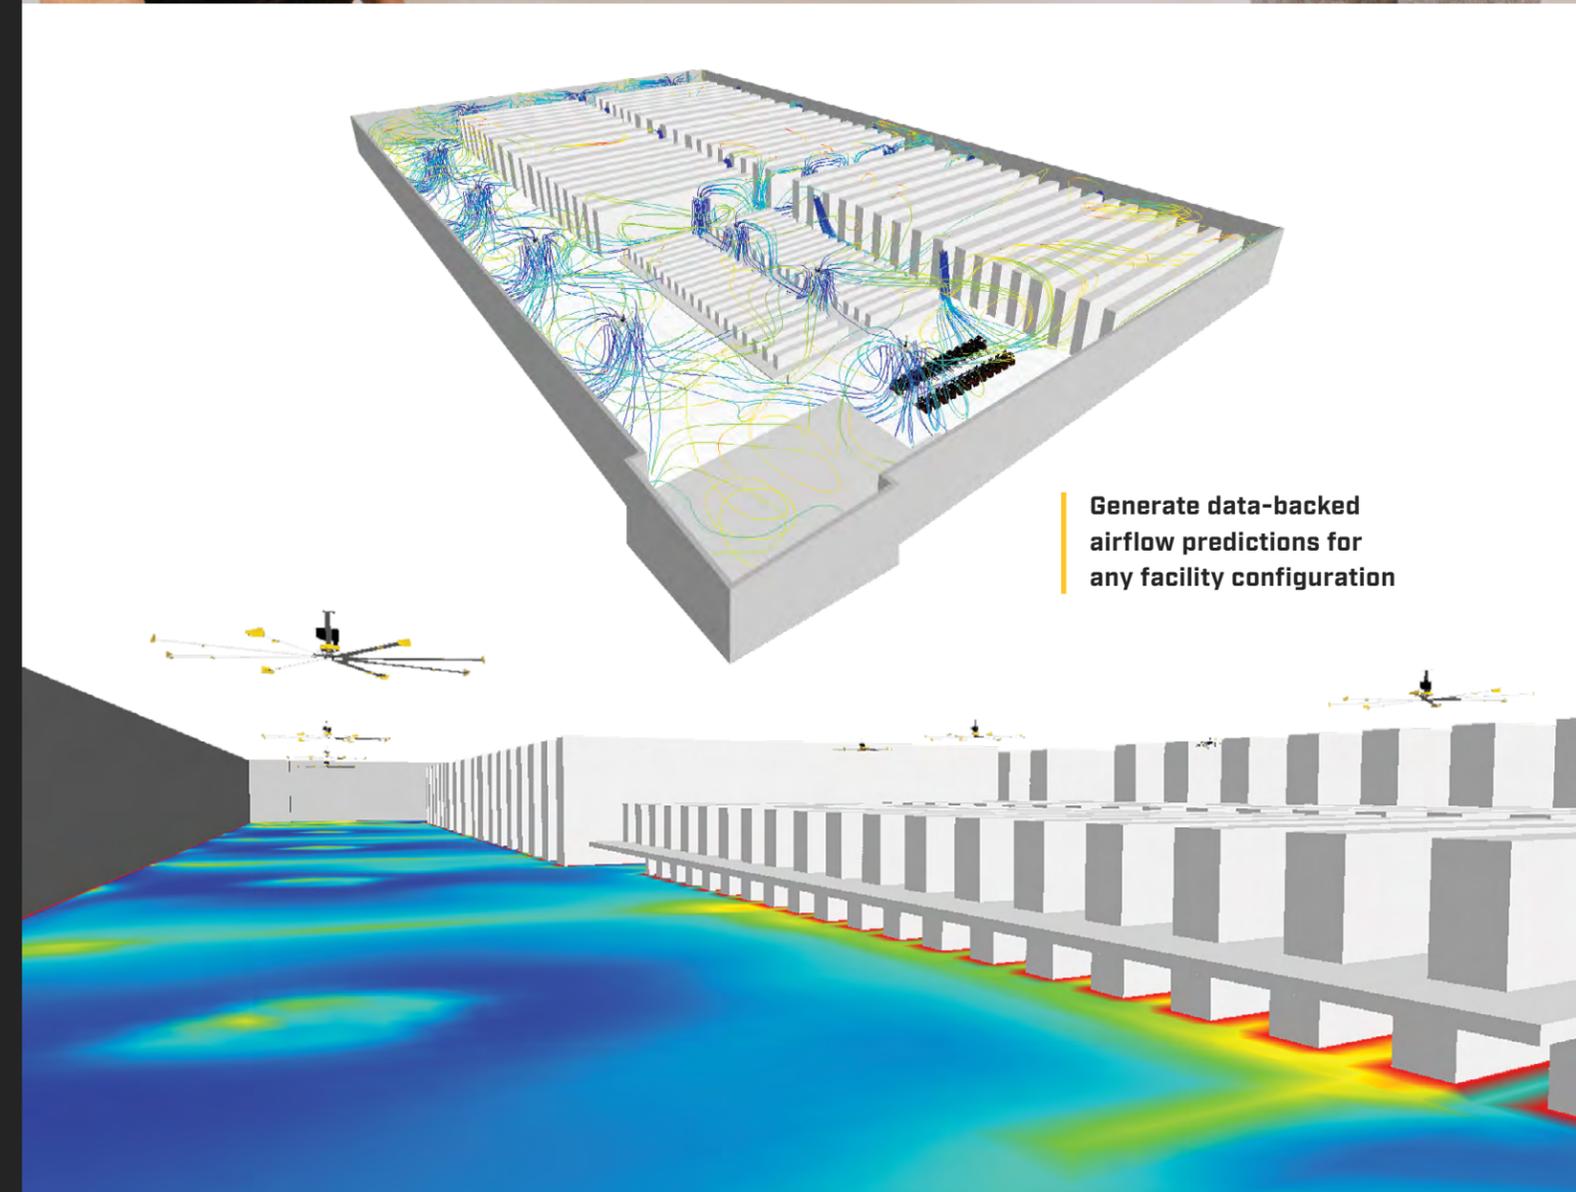

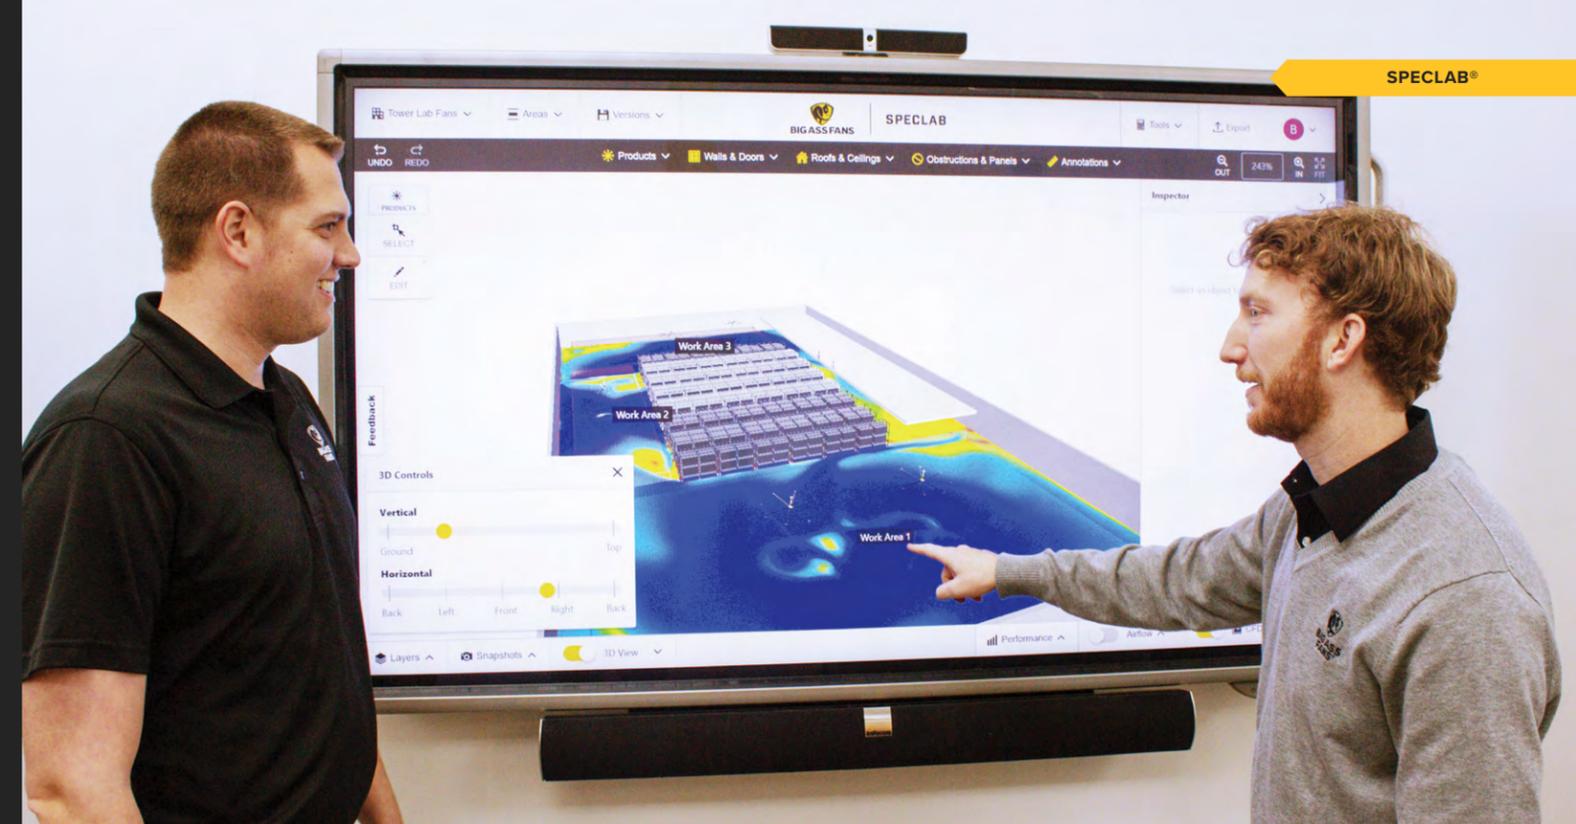

SPECLAB® SHOWS HOW OUR FANS WILL PERFORM IN YOUR SPACE.

When you invest in your people's comfort, you expect to see results. With our patent-pending SpecLab software, Big Ass Fans lets you preview exactly how our fans will transform the comfort of your space.

Using computational fluid dynamics (CFD) and proprietary airflow data collected at our one-of-a-kind research facility, SpecLab configures complex layouts—complete with interior walls, equipment, and other structural elements that impact airflow—and runs precise simulations of our fans' performance in an immersive 3D environment.

A SpecLab report is the perfect complement to a custom solution from a Big Ass Fans expert, giving you the confidence that your investment will pay dividends.

Contact us today for your free SpecLab report and custom airflow analysis.

LET THE PROS HANDLE IT

The licensed professionals in our Certified Installer Program offer the industry's best in-field services that consistently deliver what matters most to our customers.

EXPERTISE

✓ GUARANTEED WORK

You can trust our network of installers to wire, position, and mount your fans securely to ensure superior performance that lasts.

✓ FACTORY-TRAINED EXPERTS

Every installer in our program is a licensed electrical/HVAC technician who meets stringent certification and service requirements.

CONVENIENCE

✓ FAST, FLEXIBLE SERVICE

Nobody gets fans up and running faster than the pros, which means minimal facility downtime and a quick return to business.

✓ PROJECT MANAGEMENT

We'll coordinate with installers, pull necessary permits, and run logistics so our customers don't have to worry about the details.

PEACE OF MIND

✓ UPGRADED WARRANTIES

Only Big Ass Fans offers built-in electrical warranty upgrades on select models when customers use our factory-certified installers.

✓ DEDICATED CUSTOMER SUPPORT

Our world-class team is always ready with the knowledge and experience to assist with any questions or concerns.

POWERFOIL 8

Powerfoil 8 connects you with the top-level performance and expert engineering that define our Powerfoil line. Built to excel in tough environments, it provides the airflow your people need to stay safe and motivated to get the job done. With a powerful, efficient motor and multi-patented airfoil technology, Powerfoil 8 transforms your workspace with comfort and energy savings that last.

KEY FEATURES

- ▶ **Eight anodized airfoils** with AirFence® system, winglets, and safety restraints
- ▶ **IP56-rated motor** and helical gearbox for smooth, durable operation
- ▶ **Oversized hub system** machine-cut to evenly distribute load
- ▶ **Improved air circulation** and coverage area from our base HVLS models
- ▶ **Variable speed operation** with resistive touch controller
- ▶ **Plus Hybrid Airfoil** option angles airflow coverage over obstructions

BASIC 6

KEEPING WORKERS COOL AND PRODUCTIVE

**“WE’RE JUST THRILLED WITH THE
DIFFERENCE THE BIG ASS FANS HAVE
MADE. THE FANS WE HAD BEFORE
COULDN’T COMPARE.”**

— Jeff Robataille
Director of Field Operations,
Ricoh USA

Warehouse employees at Ricoh USA struggled to stay productive without A/C in the sweltering summer heat of Nashville, Tennessee, but installing HVAC throughout the 200,000-square-foot (18,580-square-meter) space was impractical. To improve conditions and keep workers safe and motivated, managers installed 10 24-foot (7.3-meter) Basic 6 fans, delivering a refreshing breeze over a wide area.

ADVANCED CONTROLS

BAFCON™

Make comfort convenient and efficient with the BAFCon controller. From a single, easy-to-use touchscreen, you can manually control or automate up to eight Big Ass fans, enable seasonal modes, and set password protection. Managing your facility's comfort and energy use has never been easier.

DEWTECT®

Don't let unwanted moisture rule your facility. Lock it down with Dewtect, the automated control system that predicts, prevents, and mitigates condensation by automatically activating your Big Ass fans and ventilation equipment. Stop worrying about slick floors, rust, mold, and mildew, and let Dewtect's network of sensors and system integration protect your people, products, and property.

KEY FEATURES

- ▶ Resistive, **LED-backlit touchscreen** ideally suited for industrial conditions
- ▶ Multi-level **password protection** keeps your preferred settings secure
- ▶ Mounts to **standard junction box** with single RJ45 cable
- ▶ **Group up to eight fans** for easy control from one location

THE WORLD'S FITTEST FANS

“PEOPLE COME TO CROSSFIT TO WORK OUT, SO WE NEED AIR MOVEMENT. THE FANS DELIVER AND THEY LOOK COOL. I HAVE NINE NOW, SO THAT SHOULD TELL YOU SOMETHING.”

— *Russell Peters*
Owner, CrossFit Total Control

Gym members want a workout atmosphere that's clean, comfortable, and conducive to training. At CrossFit Total Control in Jacksonville Beach, Florida, Big Ass overhead and directional fans clamp down on heat and boost people's workout experiences by evaporating sweat and carrying away excess body heat, protecting gym-goers from heat stress and providing a dry, odor-free space.

FRESH AIR, HAPPY COWS

Agricultural researchers at the University of Kentucky have studied the effects of thermal comfort on bovine health and milk production, so when it came time to design a new state-of-the-art facility, they trusted Big Ass Fans to provide the airflow that their research cows needed.

Six Powerfoil X3.0 fans deliver fresh air and dissipate odors in the composting barn, while two rows of Yellow Jackets provide targeted cooling in the feeding alley. The fans are durably engineered to withstand hot, dusty conditions in the open-air space, so they'll keep the barn comfortable with no more maintenance than a quick spray-down.

With Big Ass fans keeping barn conditions in check, both herd and humans can live and work in maximum comfort.

POWERFOIL X3.0

YELLOW JACKET

THE POWER TO SERVE

**“WITH THE FANS, YOU DON’T
FEEL NEARLY AS HOT. YOU CAN BE
ANYWHERE IN THE APPARATUS BAY
AND FEEL THE BREEZE.”**

- Andy Webster

Chief, Cool Springs Fire Dept.

Our first responders know it’s important to keep cool in the field. That’s why Cool Springs Volunteer Fire Department near Statesville, North Carolina, specified Big Ass fans for its new firehouse. Built in 2017, the 24,000-square foot (2,230-square-meter) facility features three Basic 6 fans that maintain comfortable conditions so firefighters stay refreshed and ready to protect their community.

COMMERCIAL AND RESIDENTIAL FANS

COMFORT IS IN STYLE

Your favorite spaces deserve comfort with the style to match. No matter what aesthetic inspires your lifestyle or business, Big Ass Fans gives you the opportunity to transform your ceiling into a centerpiece. Our commercial and residential fans come in a variety of premium finishes and custom colors to complement any décor, while their silent direct-drive motors ensure comfort without distraction.

With industry-leading airflow, award-winning performance, and groundbreaking smart functionality, our ceiling fans will elevate your everyday spaces, satisfying family and friends and keeping guests engaged and eager to return.

KEY FEATURES

- ▶ Patented design and engaging style
- ▶ Handcrafted with premium materials
- ▶ Range of available custom colors and luxurious finishes
- ▶ Versatile mounts for flat and sloped ceilings
- ▶ Virtually silent direct-drive motors
- ▶ World-class efficiency certified by ENERGY STAR®
- ▶ Unrivaled smart technology and control
- ▶ Unparalleled air movement and coverage areas

WELCOME HOME TO BIG ASS FANS

“WE NEVER THOUGHT OF FANS AS A GOOD DESIGN ELEMENT UNTIL BIG ASS FANS CAME INTO THE HOME AND REALLY STEPPED UP THE GAME.”

- Libby Landgon
Interior Designer

With i6, the residential ceiling fan receives a much-needed overhaul. In the age of smart home technology, the antiquated conventions of jangling pull chains, drooping particle-board blades, and noisy motors demanded a more refined solution. Engineered for unmatched style and functionality, i6 delivers. Its premium airfoils, silent motor, and superior LED option provide best-in-class performance, while its network of built-in environmental sensors, Bluetooth connectivity, and mobile app control ensure that comfort is never out of reach.

THE WORLD'S SMARTEST FANS

For nearly 100 years, the residential ceiling fan was a bore, stuck using paddle blades and pull chains. Then Big Ass Fans reinvented it. Combining our signature engineering with elegant design and innovative functionality, we created the world's most advanced ceiling fans—the award-winning Haiku, Haiku L, and i6.

Powered by a network of environmental sensors that detect motion, temperature, and humidity, our smart fans feature patent-pending SenseMe™ technology to monitor and manage your room's conditions according to your preferences. Our fans even play nice with leading smart home technology, integrating with voice control through Amazon Alexa or Google Assistant and syncing with ecobee thermostats.

Adjust fan speed and light levels from the palm of your hand.

Connect your fan with leading smart home devices.

Use our mobile app for control from anywhere within your Wi-Fi network.

COMFORT THAT KEEPS THEM COMING BACK

“THE FANS HAVE MADE A MASSIVE DIFFERENCE. THEY ARE AMONG THE FIRST THINGS I SPEAK ABOUT WHEN I TAKE GUESTS TO THEIR VILLAS.”

-Sam Charlton
Owner, Bedarra Island Resort

To provide vacationers a premium experience, Bedarra Island Resort in Queensland, Australia, replaced its existing ceiling fans with Haiku. In addition to keeping guests satisfied, the Haiku fans dramatically reduced the resort's energy use and require virtually no maintenance. But according to resort ownership, the best endorsement comes from the guests themselves, many of whom have been inspired to order a Haiku of their own.

HAIKU L

Remake your space the way you've always dreamed with Haiku L. Your entry point for Big Ass Fans style and performance, Haiku L delivers comfort with perfect silence and a sleek, classic design. Experience how its powerful, efficient airflow and seamlessly integrated LED will transform the look and feel of your space.

KEY FEATURES

- ▶ **Hand-balanced** hybrid resin airfoils in classic black or white
- ▶ **Seamlessly integrated LED kit** with 16 dimmable settings
- ▶ **Handheld remote** with wall mount; optional 0–10V and wired wall controls

A BETTER WAY TO COMFORT

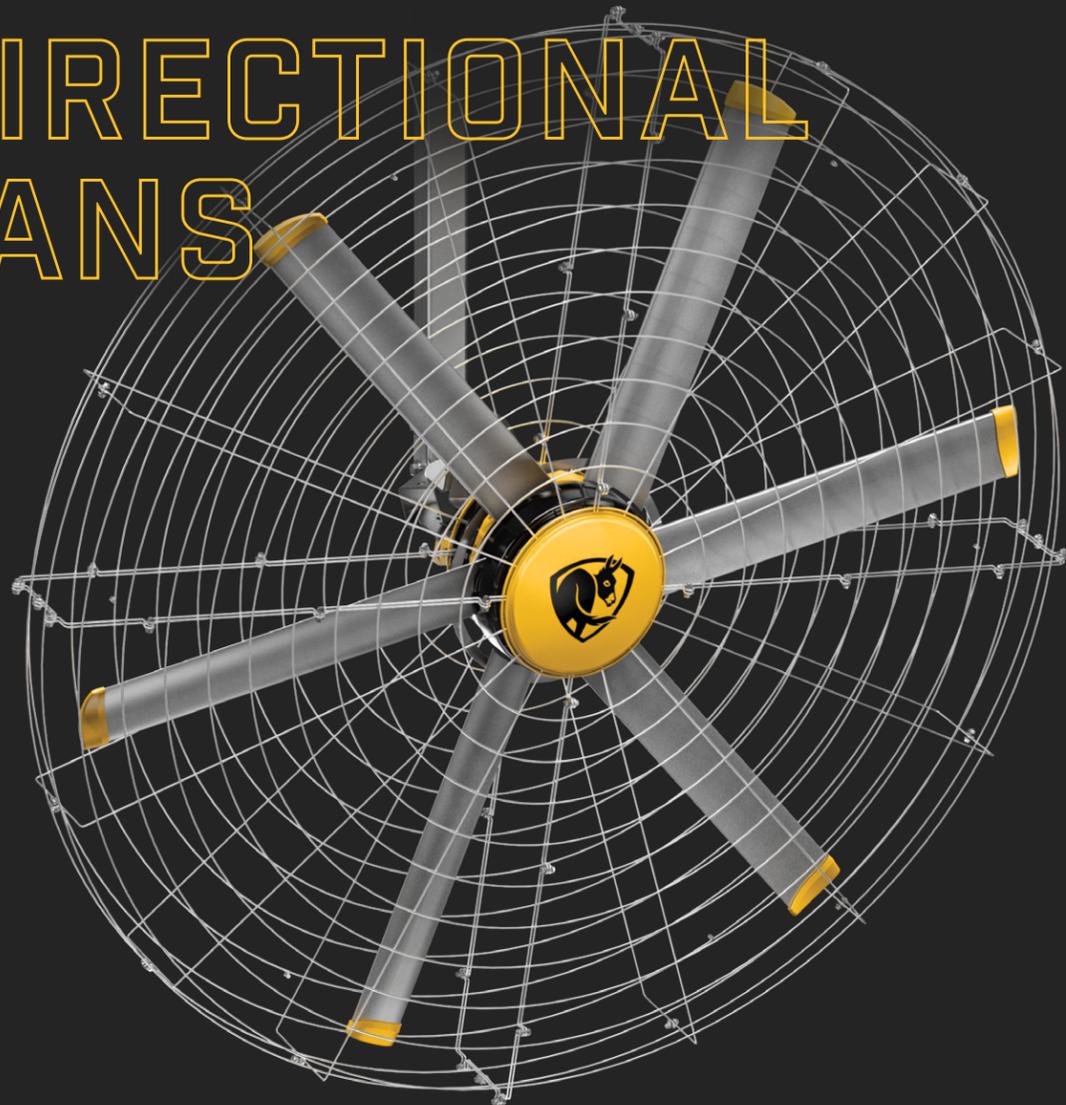

**“THE BIG ASS FANS ARE THE SINGLE MOST USED,
MOST APPRECIATED, AND MOST EFFECTIVE TOOL TO
CREATE AN ENVIRONMENT THAT IS COMFORTABLE
TO WORK AND LEARN IN.”**

-Tim Love
Facilities Manager,
Corvallis Waldorf School

Air quality, temperature, and humidity can quickly become oppressive without proper air movement in school classrooms, gyms, and cafeterias. During cooler months, overuse of A/C for the purpose of air movement results in uncomfortably cold conditions and high energy bills. That's why educational facilities around the world have turned to Big Ass Fans to improve the efficiency and sustainability of their spaces and maintain the quiet, comfortable conditions students require for learning.

DIRECTIONAL FANS

AIRFLOW THAT GOES WHEREVER YOU NEED IT

Every hot or uncomfortable space deserves transformative airflow, but obstructions such as racking, cranes, and conveyor systems can preclude overhead airflow solutions. To address these challenges, we engineered compact but powerful fan models ideally suited for mobile and wall-mounted use, so you can keep people cool in every corner of your space regardless of your facility's layout.

Built to withstand years of daily abuse and designed for the versatility to deliver airflow where overhead fans can't, Big Ass directional fans bring industry-leading air power down to earth.

KEY FEATURES

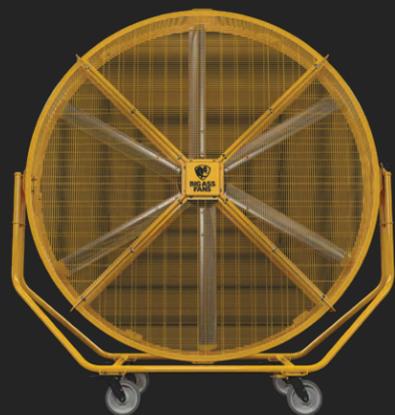

- ▶ Heavy-gauge steel construction
- ▶ Wide variety of portable bases and mounting options
- ▶ Available IPX5, washdown-ready designs
- ▶ OSHA-compliant cages standard for all floor fan models
- ▶ Easy plug-and-play operation
- ▶ Airflow coverage up to 120 feet (37 meters) away
- ▶ Quiet, efficient motors that cost pennies a day to operate
- ▶ Versatile positioning to target anywhere

AIRGO[®]

When you need maximum airflow on the move, you need AirGo. Featuring Big Ass Fans' patented HVLS technology in durable, portable frame, it delivers targeted airflow on a massive scale. Simply dial in the exact level of cooling you need and let AirGo improve conditions on the factory floor, in the service bay, or on the sidelines.

KEY FEATURES

- ▶ **Six anodized airfoils** with winglets in an OSHA-compliant cage
- ▶ **Quiet, efficient EC motor** with variable speed control
- ▶ **Full 360° tilt** with 16 lockable positions
- ▶ **Locking swivel casters** allow for optimal maneuverability
- ▶ **Powerful airflow** provides coverage up to 120 feet (37 meters) away
- ▶ **Indoor or outdoor** operation for cooling that goes anywhere

AIR POWER, REDEFINED

We designed AirGo with one principle foremost in mind: the readiness of man and material is paramount for any unit. Engineered for maximum power, mobility, and durability, AirGo offers superior directional airflow. An indestructible 8-foot (2.4-meter) steel frame and available All-Terrain package prove their worth in even the toughest environments, while a plug-and-play design, 25-foot (7.6-meter) cord, and fully angle-adjustable cage allow for fast deployment and instant airflow to your facility's hottest areas.

AIRGO

PIVOT 2.0

Deliver powerful cooling wherever you need it with Pivot 2.0. The most flexible Big Ass fan, it's capable of a virtually infinite number of speeds and positions. Wall-mount it to avoid obstructions or angle it down long aisles and let its quiet, efficient direct-drive motor create comfort where you never thought possible.

KEY FEATURES

- ▶ **Six anodized airfoils** with winglets in a durable steel cage
- ▶ **Gearless direct-drive** motor and precision-molded hub for max efficiency
- ▶ **Suite of safety features** including airfoil retainers and aircraft cables
- ▶ **Smooth, quiet performance** with variable speed control
- ▶ **Powerful airflow** provides coverage up to 120 feet (37 meters) away
- ▶ **Direct airflow anywhere** with over 1,000 operational settings

AIREYE®

Forget off-the-shelf box fans and rickety pedestal fans. AirEye brings Big Ass Fans' premium engineering to your facility with best-in-class performance, efficiency, and smart controls. An IP65-rated design and mountable, powder-coated steel frame give AirEye the durability to take on tough conditions so your workforce stays comfortable and productive.

KEY FEATURES

- ▶ **Three Galvalume® steel blades** precision-balanced for smooth performance
- ▶ **50% more CFM per watt** than basic induction motors
- ▶ **IP65-rated EC motor** for excellent protection from dust and water
- ▶ **Variable speed controller** with virtually infinite airflow settings
- ▶ **Versatile mounting options** to suit any facility or application
- ▶ **Occupancy sensor** available for added convenience and energy savings

AIREYE

KEEPING AN EYE ON COMFORT

“THE AIREYE FANS HAVE MADE A TREMENDOUS DIFFERENCE IN WORKER OUTPUT. THE FACILITY USED TO FEEL EXTREMELY HOT DURING THE SUMMER, BUT THE AIREYES KEEP EVERYBODY COOL AND FOCUSED.”

-Charles Basso
Maintenance Manager,
VF Outdoor

A favorite of employees in tight workspaces and along conveyor lines, AirEye provides cooling airflow down racking aisles in VF Outdoor's Visalia, California, distribution center. The fans' versatile mounting options and powerful direct-drive motors keep workers comfortable and productive and aisles quiet and clutter-free. Equipped with an optional occupancy sensor, each AirEye fan saves time and energy by automatically turning on when motion is detected and switching off after a period of inactivity.

YELLOW JACKET®

Finally, a directional fan engineered to stand up to industrial use and abuse. Yellow Jacket features a highly efficient, IPX5-rated motor with variable speed control and an indestructible frame. Mount or wheel it into your grittiest spaces to deliver airflow that cools and refreshes your people, then hose it off and put it right back to work.

KEY FEATURES

- ▶ **Heavy-gauge steel frame** for durability in industrial applications
- ▶ **Vibration dampening** with high-density polyethylene housing
- ▶ **Three durable fan blades** with progressive-pitch geometry
- ▶ **10 speed settings** with powerful and efficient 1/2 HP motor
- ▶ **360° rotation** with lockable positioning
- ▶ **Fan oscillator** and remotely mounted control options

US +1 877.244.3267 | CA +1 844.924.4277 | AU +61 1300 244 277 | SG +65 6709 8500

YELLOW JACKET

AIRFLOW THAT GETS THE JOB DONE

Until finding Big Ass Fans, Heather Cannon Honda in Ponca City, Oklahoma, struggled with problems common to spaces throughout the auto industry: stifling heat and humidity, lingering fumes and odors, and high costs for installing and operating A/C.

Determined to find a more efficient way to solve these problems, Cannon Honda turned to Big Ass Fans, installing overhead Essence fans to deliver comfort in the showroom and Yellow Jackets for targeted airflow in the garage to quickly dissipate fumes and help keep surfaces dry and safe.

SWEAT BEE[®]

Built to deliver targeted airflow to harsh industrial spaces, Sweat Bee cools hardworking people and hot materials from up to 120 feet (37 meters) away. Mount it over a conveyor system or aim at a workstation for a powerful cooling solution that's as reliable as it is cost effective.

KEY FEATURES

- ▶ **Corrosion-resistant barrel** with 11-gauge steel construction
- ▶ **Statically and dynamically balanced** fan blades for lasting performance
- ▶ **Ball bearing motor** with 1 HP and 1/3 HP power options
- ▶ **Delivers targeted airflow** farther than any Big Ass directional fan
- ▶ **Full 360° rotation** and 40° tilt to target airflow to preferred angle
- ▶ **Ideal for personal comfort** or reducing cooling times for hot materials

EVAPORATIVE COOLERS

THE FAST-ACTING SOLUTION TO EXTREME HEAT

Cold Front takes evaporative cooling to the next level with class-leading design and powerful performance that can be mobilized to any corner of your facility. Combining efficient direct-drive fan technology with robust water systems and thick, resin-treated media, Cold Front delivers instant airflow that lowers the air temperature and keeps your people safe, comfortable, and productive.

KEY BENEFITS

- ▶ Quickly and efficiently cool spaces by up to 33 °F (18 °C)
- ▶ Deliver comfort to areas from personal workstations to large service bays
- ▶ Mobilize to indoor and outdoor areas with locking swivel casters
- ▶ Easily adjust level of cooling with variable speed control options
- ▶ Take advantage of long-term cost savings over A/C installation and use
- ▶ Enjoy best-in-class durability and warranties for long product life

COLD FRONT
— BY BIG ASS FANS —

COLD FRONT

Heat can cripple your facility's production and put your people at risk. Cold Front evaporative coolers—also known as swamp coolers—provide a rapid, effective response.

US +1 877.244.3267 | CA +1 844.924.4277 | AU +61 1300 244 277 | SG +65 6709 8500

THE ULTIMATE COOLING COMBO

Whether you run a small workshop, a busy five-bay garage, or a massive warehouse, you need an effective solution to maintain a safe, productive environment without battling exorbitant energy costs. Cold Front evaporative coolers take the fight to workplace heat on the ground, while Big Ass overhead fans provide industry-leading air movement from above, keeping your people comfortable and motivated without costly A/C use.

Pairing Cold Front coolers with our overhead fans silently and efficiently delivers the benefits of powerful spot-cooling and elevated air speed to every corner of your facility. When used in tandem, the two systems offer maximum cooling, coverage areas, and energy savings so your team can do what it does best.
